World Champs 1987 Special Edition

The World Stage

Last week team 1987, after an amazing season in regionals across the area loaded up for Houston, Texas to compete in the FIRST World Championship. This year team 1987 had an amazing season winning two regionals, the Innovation and Control award, the Industrial Design award, and having Dean's list finalist. Our regional success brought us all the way to the World Championship in Houston, Texas. At the championship we played fiercely and ran a number of new autos. After qualification matches, we ended up as the first pick of the sixth seed alliance. During elimination matches we persevered and pushed through. After our elimination matches had concluded in the semi-final, we packed up and watched finals on our field and then the Einstein matches. During the event, team members could explore the Innovation Faire, other teams pits, and learn about so much of what FIRST has to offer to improve for next year. Ultimately it was a great way to finish off a great year!

Summer Fun

The Broncobots host robotics camps for elementary and middle school aged students to explore and develop an interest in engineering and technology. Students are given a game task and one week to build a functional robot out of VEX parts, as well as the chance to design flyers and websites. Throughout the week, students come away with knowledge and new friendships.

Additionally, the team hosts an engineering camp for elementary students, where students learn about different type of engineering every day.

Signing off

Hello, everyone! This season has been an incredible journey for our team and we just wanted to take a moment to thank everyone who helped, and continues to help us bring this team to life. We'd like to thank our team's parents, mentors, sponsors, and everyone else who keep us running and who push us forward; working to be the best team we can. Thank you.

Calendar

- June 5 - 9: Robotics Camp Week 1
- June 12 - 16: Robotics Camp Week 2
- June 19 - 22: Engineering Camp
